

# AITelecom's Unified Communications Solutions for Secure K12 Schools and Efficient School Communications

## Adaptable and Affordable

The technology has transformed the K-12 education in involving families and school communities to better instruct students and bringing a more responsive emergency management system. But not all schools can afford to utilize the latest technology by upgrading or replacing their older, outdated system. They have to weigh the benefits of the telecom investment against the burden of limited IT budget. Fortunately, **AITelecom's** Unified Communications have stepped in to make technology more cost-effective for K-12 schools of any size.

## How Unified Communications solutions can help?

Built with K-12 schools in mind, **AITelecom's** award-winning Unified Communications solutions provide robust and easy-to-use features to constitute safer and better collaborated schools at the right price.

**AITelecom** easily integrates; **PA/Bells, Phones, Security; Door Access, Cameras, Classroom Smart Boards, Signage and classroom curriculum, into one easy to manage solution**, radically strengthening safety and collaboration while slashing the overhead cost.
